Riffa, Bahrain | Riyadh, Saudi Arabia | Eligible to work in KSA and Bahrain

SUMMARY

Results-driven EPC Warehouse & Preservation Lead and Materials Management Specialist with over 6 years of progressive experience managing complex material operations for multi-billion dollar oil and gas mega-projects. Proven expertise in strategically optimizing warehouse layouts, cutting material handling costs by 25%, and implementing robust inventory control systems that maintained accuracy and prevented costly construction delays for over 5,000 equipment and package deliveries. Adept at developing preservation job plans using EasyPlant, managing thousands of shipments, ensuring stringent HSE compliance, and leading cross-functional teams to achieve critical project milestones. Currently pursuing a PG Dip in Supply Chain Management and Global Logistics, demonstrating a commitment to advanced strategic thinking and continuous learning.

CORE COMPETENCIES

📦 Preservation & Materials Management:

Materials Management, Material Preservation, Long-Term Storage, VPCI Application, SAP MM, SPMAT, EasyPlant, GAIA (EDMS), Inventory Control, Scrap Management, Spare Parts Management, Strategic Sourcing.

🔍 Inspection & Quality Control:

MTC Verification, GAD Drawing, OSD Reports (IMSR), Damage Reports, NCR Follow-up, 3rd Party Audits, Quality Control, Mechanical/Piping Receiving Inspection, Client RFI, Root Cause Analysis (RCA) (for OSD/NCR resolution), Quality Assurance (QA).

💻 Technical Skills:

AutoCAD, Microsoft Office Suite (Excel, Word, PowerPoint), PLC, CNC, Data Analysis & Performance Reporting, Budget Management, Basic ERP Systems, WMS (Warehouse Management Systems).

📦 Logistics & Warehouse Operations:

Inbound/Outbound Shipments, Warehouse Optimization, Logistics Coordination, Subcontractor Management, Equipment Management, Manpower Allocation, 5S Principles, Space Management & Planning, 3PL Management.

🛡️ HSE & Compliance:

ARAMCO SAEP-385, ASME, API 686, HSE Protocols, Risk Assessment (HSE), Safety Audits and walkthrough, Natural Disaster Mitigation, PTW (Permit to Work) Issuance, Lean Six Sigma Foundations.

🗣️ Languages:

English (C2 Proficient), Urdu/Hindi (Fluent), Arabic (Basic).

PROFESSIONAL EXPERIENCE

Technip Energies — Riyadh, Saudi Arabia

Jan 2025 – Present

Spare Parts/Preservation Coordinator & Asst. Mechanical Supervisor

- Directed comprehensive preservation activities for the ARAMCO SRU Refinery Project, ensuring stringent compliance with ARAMCO SAEP-385 and ASME standards, which minimized material degradation and prevented potential project delays.
- Developed and assigned asset-specific preservation job plans for over 300 critical units utilizing EasyPlant, Technip Energies' in-house construction web-based application.
- Managed the entire spare parts lifecycle from initial receipt through to client handover via GAIA (Engineering Document Management System - EDMS), ensuring meticulous documentation including BOM, PO, PL and traceability.
- Supervised and trained a team of technicians in daily preservation tasks, specialized material handling, and optimized warehouse operations, including expert VCI (Vapor Phase Corrosion Inhibitor) application to prevent corrosion and extend asset lifespan.

- Expedited critical shipments and optimized storage strategies using SPMAT, achieving a quantifiable reduction in material degradation risks in challenging climates and ensuring on-time project delivery.
- Conducted rigorous receiving inspections for mechanical, piping, and pre-fabricated materials, and managed daily material receiving reports (DMRR), ensuring strict quality control and adherence to project specifications.

TTSJV — Bahrain

Jul 2019 – Dec 2024

Warehouse Mechanical Supervisor

- Solely managed Mechanical and Packages end-to-end material operations for Bahrain's BMP Project, a \$5B+ mega project and the largest industrial undertaking in Bahrain's history, overseeing 6 distinct project areas and coordinating with over 10 subcontractors.
- Managed the comprehensive material lifecycle for thousands of critical shipments and millions of individual materials, including over 5,000 main equipment tags and 5,000+ tons of structural steel, ensuring seamless supply chain integration and operational continuity.
- Rigorous enforcement of strict HSE protocols during all material handling, storage, and subcontractor management activities directly contributed to the project's remarkable safety record of '330 million man-hours without LTI,' significantly surpassing industry benchmarks.
- Conducted over 4,000 detailed inspections against GAD drawings and Material Test Certificates (MTCs) for mechanical, piping, and structural materials, directly contributing to a substantial reduction in material rejection rates and ensuring project quality compliance.
- Oversaw all receiving operations, including efficient unloading, thorough inspection, precise verification, and accurate documentation of incoming shipments. Proactively resolved Out-of-Scope/Damage (OSD) reports with over 100 vendors without impacting critical construction timelines.
- Managed materials and executed strategic space planning for diverse categories including handover materials, capital spares, 2 years operational spares, test rings, and surplus materials, optimizing warehouse utilization and supporting seamless project closeout and operational readiness.

EDUCATION & CERTIFICATIONS

Education

- University of Essex, United Kingdom
PG Dip Supply Chain Management and Global Logistics (In Progress)
(Expected completion: Oct 2025)
- AMA International University, Bahrain (ABET Accredited)
B.Sc. Mechatronics Engineering (Jan 2015 - Apr 2019)

Certifications & Professional Development

- Saudi Council of Engineering: Registered as Mechatronics Engineer (2024)
- Saudi Engineering Council: Fundamentals of Oil and Natural Gas Industry, Sustainability Achievement Techniques, Building Quality Systems in Projects, Golden Rules for Implementing Safety (2024)
- LinkedIn Learning: CSCMP Supply Chain Foundations, Lean Six Sigma Foundations, Learning SAP MM, Construction Management, Project Management, Occupational Safety and Health, Lean Inventory Management, Managing Logistics (2024)
- TRACE Global: Anti-Bribery Compliance Training (2019)

PERSONAL DETAILS

Nationality: Pakistani

Residency Status: Wife Bahraini (Permanent residency, transferable) (immediately available); Saudi Arabia - Riyadh - Contractual - Currently working with Transferable IQAMA (30 days notice).

Licenses: Bahrain/Saudi driving licenses.

Date of Birth: September 20, 1993
