Professional Summary

Plant Operations Specialist with over 11 years of experience in industrial operations within SABIC. Expertise in managing operational processes efficiently, ensuring safety and quality standards to maintain performance sustainability. Proven track record of developing and implementing innovative solutions to enhance industrial operations, reduce costs, and increase productivity by adopting modern technologies. Strong leadership abilities in team training and fostering collaboration to achieve operational goals with the highest standards.

Professional Experience

Group Leader | SABIC

- Lead multiple teams across 5 plants, implementing various operational systems to ensure high operational efficiency.
- Oversee the operation and maintenance of large machinery, ensuring adherence to top performance standards.
- Develop and implement initiatives to improve workplace safety, contributing to a reduction in accidents and damages.
- Coordinate team training activities, enhancing operational skills to ensure the precise execution of operational procedures.
- Provide immediate technical support to the team to resolve operational issues, improving production efficiency.

Plant Operator (Internal) | SABIC

- Manage and execute plant operations adhering to the highest industrial safety standards.
- Coordinate with various departments to ensure operational objectives are met and improve plant productivity.
- Rapidly identify and analyze operational issues, implementing effective solutions to fix faults and perform routine maintenance.
- Inspect the final product for quality at each stage of production, ensuring compliance with global standards.
- Propose process improvements, such as reducing water consumption by 25%, which led to cost reduction & increased efficiency.

Plant Operator (External) | SABIC

- Operate external plants, ensuring compliance with security and industrial standards.
- Handle electrical equipment under 450KW, ensuring safe and efficient operation.
- Train operational teams on basic safety techniques and raise environmental awareness in the workplace.
- Monitor machinery and equipment performance to ensure continuous high-quality production under careful supervision.
- Lead efforts to improve machine cooling systems and develop solutions to reduce water consumption, contributing to environmental sustainability and cost reduction.

Education

Diploma in Plant Operations | Jubail Technical Institute | Jubail Industrial City | Graduation Year: 2015

- Completed specialized training course from SABIC.

Professional Training

Plant Operations Internship - SABIC Training Program | February 2014 - November 2015

- Participated in the operation of various equipment and systems within the plant to ensure compliance with safety and efficiency standards.
- Monitored product quality and ensured compliance with specifications before storage.
- Completed safety training programs, including handling electrical equipment and emergency systems.
- Contributed to regular and emergency equipment maintenance, ensuring readiness without interruption.
- Collected and analyzed operational data on machines and equipment to identify improvement areas and increase work efficiency.

Skills

Soft Skills

- Leadership | Effective Communication | Working Under Pressure | Organization | Team Management | Training Skills | Adaptability | Teamwork | Analytical Thinking

Operational Skills

- Plant Operations | Process Improvement | Quality Control | Fault Detection | Product Inspection | Performance Monitoring | Maintenance Management | Procedure Development | Production Planning | Safety Management | Data Analysis | Quality Assurance

Technical Skills

- Excel (PivotTables, VLOOKUP) | Power BI | SAP | AutoCAD | Electrical Equipment Handling | Data Analysis | Database Management | Production Systems | Visual Inspection | Monitoring Systems | Basic Programming | Industrial Data Processing | Microsoft Office | Microsoft Word
