EXPERIENCE SUMMARY

Interior Designer specialized in kitchen design, with 3 years of practical experience that began in the Italian kitchen division at Bayt Al Abyaa and continues in my current role at Aermes Architectural Office. I successfully contributed to the design of the Lube Italian Kitchens showroom for Bayt Al Abyaa in Jazan, demonstrating a deep understanding of aesthetics and client needs. In terms of leadership, I served as the President of the Design and Architecture Club during university and led a volunteer visual arts team. I also participated in the Mohammed Bin Salman Project for the Revitalization of Historical Mosques, which allowed me to engage in culturally significant architectural work. On the administrative and social side, I prioritize delivering the best possible experience to clients through professional and seamless communication, reflecting the values and professionalism of the team. I possess strong skills in development and continuous improvement, always seeking to learn and implement effective practices in the work environment for both professional and personal growth. I am committed to performing all tasks with the highest levels of accuracy, professionalism, and precision.

EDUCATION

Jazan university , Jazan, 2022
Bachelor's Degree: Interior Design

EXPERIENCE

Interior Designer

10/2024 - Current

• Interior Designer & Assistant to the Chief Architect

- Assisting in the development of initial concepts and ideas for architectural layouts in alignment with project goals.
- Preparing preliminary drawings for furniture layout to ensure functional and aesthetic space planning.
- Creating interior design visualizations that harmonize with the architectural design concept.
- Communicating with clients, welcoming them, and understanding their needs to deliver tailored design solutions.

Amal Zahari
Interior design

- Supporting the preparation of presentation files and client materials.
- Creating mood boards and analyzing them in line with the project's context and identity.
- Working on culturally inspired commercial projects that blend visual identity with functionality.
- Providing comprehensive kitchen design solutions that balance practicality and aesthetics.

Bayt Al-Ebaa – Kitchen / Engineering Department

2022 - 2024

- Worked in the Kitchen Department as a designer and sales engineer.
- Designing kitchen spaces inspired by natural materials, with a focus on sustainability — most components are recyclable. Worked closely with clients to meet aesthetic and functional needs using specialized design software.
- Engineering Department: Utilizing the company's materials in interior design, façades, and landscape, while assisting clients in selecting suitable finishes prior to purchase.
